

Cotton sector organisation models and their impact on farmer's productivity and income

Roger Peltzer

Daniela Röttger

Contents

Abbreviations

Summary	1
1 Introduction	2
2 Conceptual and empirical approach	5
2.1 Organisational models of the African cotton sector	5
2.2 Contract farming and the competition-coordination trade-off	6
2.3 Analytical framework and empirical indicators	8
3 Cotton sector performance within the COMPACI countries	9
3.1 Quality	9
3.2 Access to input and investment loans	11
3.3 Cotton yields, farmers' share of the cotton world market price and revenue	13
3.4 Price volatility – a core problem not only for farmers	18
3.5 The cultivation of cotton versus food crops	20
3.6 Environmental and social standards in cotton farming	23
4 Conclusion: a comparison of organisational forms of the cotton sector	26
